Primary school teachers of the 12th comprehensive school of Norin district of Namangan region

### Annotation

Primary education is typically the first stage of formal education, coming after preschool/kindergarten and before secondary school. Primary education takes place in primary school, the elementary school or first and middle school depending on the location. The following article is devoted to the primary education and its role among young people.

**Key words:** primary education, curriculum, syllabus, interactive method, technology.

Education is a collaborative activity between teachers and students, in which the individual's development, education and upbringing take place. In the classroom, the teacher communicates his / her knowledge, skills and abilities to the students through the lessons, and the students will be able to use it as they master it. In the process of learning, students use different forms of learning, that is, they rely on specific differences in the reception, processing and application of the acquired information. In the educational process, the issues of cooperation between teachers and students during the lessons, independent work of students, education and upbringing in the form of extracurricular activities are addressed.

The purpose of education is shaped according to the needs of society. Therefore, the purpose of education should be appropriate and balanced. In the scientific literature, the purpose of education is to develop the skills and abilities to use the opportunities accurately, clearly and appropriately, to develop logical and creative thinking, to increase communicative literacy, to assimilate the national idea, to form an oriental upbringing. naval enrichment. The educational goal is to improve students' communication skills through independent thinking, oral and written literacy, and the development of logical thinking. The purpose of education is spiritual, ideological and moral education. In the process of learning a language, it is possible to get closer to the cultural and moral values of the people.

One of the great sages said, "... if you live with worries about the future, teach your children well." It is safe to say that the reforms in the education system in our country are not really a matter of achieving results in a year or two or in a short period of time, but a change that will last for hundreds of years. It shows that our president cares about our future, our future generation, and that all the children of our country are my children, and that they should be stronger, more educated, and, of course, happier than we are.

It is known that the introduction of advanced pedagogical and new information technologies in education not only increases the effectiveness of teaching, but also in the education of an independent and logical thinking, well-rounded, highly spiritual person through the application of scientific achievements in practice. is important.

There is a growing interest in the use of interactive methods and information technology in education. One of the reasons for this is that so far in traditional education, students are taught to acquire only ready-made knowledge, while the use of modern technology allows them to search for their own knowledge, independent learning and thinking, analysis doing so teaches them to draw even the final conclusions themselves. In this process, the teacher facilitates the development, formation, acquisition and upbringing of the individual, as well as acts as a leader, a guide. In today's education, "Brainstorming", "Brainstorming", "Networks" method, "Syncway", "BBB", "Fifth plus", "6x6x6", "Debate", "Role play", Modern technologies such as FSMU, "Working in small groups", "Rounded snow", "Zigzag", "I have the last word" are used.

Used in repetition or reinforcement activities in the classroom. The choice of a type of game depends on the type of lesson, the level of training of students in the game, their level of knowledge, opportunities for independent creative work, the ability to quickly recall what has been learned, the degree of creativity.

Education focuses on teaching students to think, to understand the opinions of others and to express these ideas orally and in writing, takes place. The way of life and cultural creativity of a nation is studied on the basis of its rich historical heritage.

Today, teachers are required to use advanced pedagogical and new information technologies in the teaching process. Based on the above, based on our experiences, we will share our ideas on how to teach using interactive methods in the classroom. We hope that it will help our colleagues to increase the effectiveness of training. It will also be one of their closest assistants to students in fulfilling their responsibilities, such as choosing their direction and developing skills to prepare for independent living. Here are some suggestions on how to use modern teaching methods in your classroom. You use it in a creative way, and let's look for the answer to the question of our first president: "What are we doing today to instill in our children a sense of pride and devotion to our motherland, where every age is sacred", - we hope that you will contribute to the achievement of the intended goal by implementing modern methods of education and upbringing.
