

CHANGES IN ENGLISH TEACHING METHODOLOGY AND EDUCATION SYSTEM

Ahundjanova Mohira

Senior teacher of the Department of foreign languages, Fergana State University

One of the current issues is to educate the younger generation in the spirit of love and devotion to the motherland, national pride, high morals and spirituality, pride in our ancient and rich heritage, national and universal values through the teaching of foreign languages. Radical reforms in the world education system raise the problem of creating the necessary conditions for students to learn foreign languages perfectly, to express themselves in all areas with knowledge of a foreign language, to develop their oral and written speech in a foreign language. Organizations such as UNESCO, UNICEF, the European University Association, the European Network for Higher Education Quality are involved in the development of students' thinking in a foreign language, the ability to speak fluently, the formation of intellectual activity, the assessment of their readiness. is being used. The development of these issues in general trends plays an important role in the formation of modern and foreign language skills in the younger generation and serves to increase the creative abilities of students in connection with the problems of modern education.

In the reform of the education system of the Republic, the coordination of curricula based on foreign experience in accordance with international standards has become the basis for improving the system of higher pedagogical education. In the context of Uzbekistan, a radical reform of the quality of education based on foreign experience, taking into account our national mentality and traditions, is a requirement of the times. In this regard, the Action Strategy for the five priority areas of development of the Republic of Uzbekistan for 2017-2021 states: To stimulate research and innovation, to create effective mechanisms for the implementation of scientific and innovative achievements, to improve the quality of training, to create the necessary conditions for the training of qualified specialists in accordance with international standards, each higher education institution to establish close cooperation with educational institutions and develop students' creative abilities, effective use of interactive methods in working with young audiences, to provide them with quality education in a foreign language, to raise the level of higher education to an exemplary level and Improvements have been identified as key tasks.

Therefore, in order to form the ability to read the original literature on the specialty, to participate in oral communication in a foreign language in the process of production of future personnel in the higher education system of the republic and finding the information necessary for scientific purposes classes are being held.

Every citizen of the independent Republic of Uzbekistan must be able to read the original literature in a foreign language, understand the text and use it in their profession. He should also be able to communicate freely in a foreign language with his interlocutor on a given topic. After all, learning foreign languages is a requirement of today's globalized world.

Thanks to independence, special attention is paid to the teaching of foreign languages in our country. Thousands of foreign language teachers have been trained, all conditions have been created for staff to improve their skills in our country and abroad, multimedia textbooks in English, German and French, electronic resources for learning English have been prepared. The organization of language rooms is a clear proof of this. The main goal is to create conditions for young people to use the achievements of world civilization and information resources around the world, to develop international cooperation and dialogue, by teaching the younger generation in foreign languages and improving the training of specialists who are fluent in these languages. The famous German scientist Y.V. As von Goethe said, "He who does not know a foreign language does not know his own language." For this reason, it is important not only for foreign language specialists, but also for all future professionals studying in non-language universities to be able to learn foreign languages and communicate freely. There is a proverb among our people: "He who knows the language knows". Indeed, a person who knows a foreign language will have many opportunities and advantages. One of the main requirements for today's staff is a good command of foreign languages.
