

## DESCRIBING MY OWN EXPERIENCE OF LEARNING LANGUAGES

Gaukhar Serikbaevna Khaldarchaeva

Senior teacher of Interfaculty department of foreign languages

Chirchik State Pedagogical University

### Abstract

This article discusses the process of learning foreign languages from my own experience: If we started the learning process and materials, that are implemented during the lesson, they were all prepared according to our level and became tougher step by step, when we passed the higher level. Texts were all taken from the magazines and journals, that were published in Europe, which means all of the texts were authentic materials for improving the learners' knowledge. After learning the basic grammar rules, it started to seem easier to acquire and my self-confidence went up every day.

**Keywords:** Excellent user, speaking clubs, debates and movie time, difficulties, different circumstances, authentic materials, determination, self-confidence, pronunciation, huge intellect, grammatical structures, practicing.

### Аннотация:

В этой статье обсуждается процесс изучения иностранных языков на основе моего собственного метода. Если мы начали процесс обучения и материалы, которые внедряются во время урока, то все они были подготовлены согласно нашему уровню и постепенно усложнялись когда мы переходили на более высокий уровень. Все тексты были взяты из журналов которые мы издавали в Европе, что означает все тексты были аутентичными для улучшения знаний учащихся. После изучения основных правил грамматики мне стало казаться, что усваивать их стало легче и моя уверенность в себе росла с каждым днем.

**Ключевые слова:** Отличный пользователь, разговорные клубы, дебаты и временное кино, трудности, различные обстоятельства, аутентичные материалы, определение, самоуверенность, произношение, огромный интеллект, грамматические структуры, практика.

### Annotatsiya

Ushbu maqolada o'z tajribamdan chet tillarini o'rganish jarayoni muhokama qilinadi .agar biz dars davomida amalga oshiriladigan o'quv jarayoni va materiallarni boshlagan

bo'lsak,ularning barchasi bizning darajamizga muvofiq tayorlangan va biz yuqori bosqichga o'tkanimizdan keyin bosqichma bosqich murakkablashdi.Matnlarning barchasi jurnallardan olingan bo'lib,biz Evropada chop etdik,bu shuni anglatadiki,barcha matnlar o'quvchilar bilimni oshirish uchun mo'ljallangan materiallar edi.Asosiy Grammatik qoidalarni o'rganganimdan so'ng,buni o'zlashtirish osonroq bo'lib tuyuldi va o'zimga ishonchim kundan kunga ortib bordi.

**Tayanch so'zlar:** Ajoyib foydalanuvchi, gaplashish klublari, debatlar va vaqtinchalik kino, qiynchiliklar, turli vaziyatlar, autentik materiallar, aniqlik, o'ziga ishonch, talaffuz, katta intellect, Grammatik strukturalar, amaliyot.

It is undeniable true that the current situation, which is being resumed these days, requires acquiring as more language as an individual can. The reason for this situation is that, without at least a foreign language, person can not fulfill his or her aim completely. I have learnt the English and German languages so far, that took 2 years to learn these languages as an excellent user.

I commenced to study the following two languages 5 years ago, when I entered university for getting bachelor degree. I clearly remembered those days with huge fun, because I really wanted to be master of both the languages, because my study requires them equally and I came across with several issues at the beginning of the study period. As the days passed I try to resist the difficulties, which provoked during the learning process. I attended 4 times in a week and at the weekend we had speaking clubs, debates and movie time, whose initial aim was to enhance our listening and speaking skills. My tutor was a native speaker, whose name is Tim and handsome guy with huge intellect, conducted the lessons both interesting and effectively by involving each member of the group in the process of learning equally. As coin has both sides, our tutor sometimes used to make some mistakes in terms of writing because we could not consider like him and our opinions were contradicted to each other in different circumstances. To tell the truth his speech was perfect and pronunciation was incredible great, which inspired me to do acts like him.

If we stared the learning process and materials, that are implemented during the lesson, they were all prepared according to our level and became tougher step by step, when we passed the higher level. Texts were all taken from the magazines and journals, that were published in Europe, which means all of the texts were authentic materials for improving the learners' knowledge. Additionally, at the same time I had to maintain both languages and it seemed unreachable at initial part, however, I managed to overcome fear and difficulties with the help of much effort and determination, which played a crucial role in my learning process. Because of their grammatical likeness, after learning the basic grammar rules, it started to seem easier

to acquire and my self- confidence went up every day. As a result within 4 months I began to communicate these two languages with some minor grammatical mistakes, which were rectified by my tutor immediately at the time of speech. From my point of view I mastered all integrated skills as fully as I can, but the small gap can not be ignored. Because of not being the native speaker, chunks are my weak point, that sometimes appears during the communication with natives speakers.

All in all my learning process is still resuming with great interest, because the language is something, that demands to revise all time and without it you may fail to remember some words or grammatical structures. As it is said, practice makes perfect, so I am always in the process of learning and practicing both the German and English languages.
