Annotation: In this article we will talk about the conditions created for the employment of young people to engage them in entrepreneurship.

Keywords: Youth, entrepreneurship, business idea, Employment, Innovation, Technology, forum, information and communication.

President Of The Republic Of Uzbekistan Sh.Mirziyoyev acknowledged, “we all know well that entrepreneurship and business characteristics are primarily intended to pave the way for young people, but it will also be true” one of the important needs that is being felt at a time when the whole society is developing at a great speed today is the systematic implementation of innovative ideas for young people of Uzbekistan After all, without innovative ideas, positive changes can not happen. The most modern complex technologies are already immediately mastering the production techniques that have passed their lifetime. The tools that appear to be simple for almost all of us at night, are not able to meet our needs today. This, in turn, dictates the need to open a wide way to entrepreneurial activity. As a result, little neglect, time-wasting, being in a neglected attitude to the entrepreneur leads to the loss of many things, and in progress to lag behind others. In such conditions, it is very important that young people are created the appropriate conditions for the establishment of youth entrepreneurship, taking into account such qualities as the end of innovation, the tendency to rapid changes, the ability to think deeply and diversively due to the breadth of the world outlook, the superiority of the tendency to change the world, the ability to overcome

It is very important to pay special attention to young people studying in professional, technical and higher educational institutions. For the same reason

In 2017-2021 in the "strategy of action" on five priority directions of development of the Republic of Uzbekistan...particular emphasis is placed on the need to” recruit graduates of higher educational institutions and attract them to the sphere of private entrepreneurship". It remains only to say that the president of our republic, proceeding from the same strategic demand, is the head of Sh.Mirziyoyev also expresses a special attitude to this issue during his visit, which is organized with the aim of getting directly acquainted with the creative work carried out in the places.

On the spot, however, a lot of positive actions have been taken to attract young people to entrepreneurial processes more broadly. The organization of such projects as “my business idea”, “young entrepreneur – a supporter of the land”, “young entrepreneur – a base of the country” in order to further expand the coverage of their active participation in entrepreneurial activities plays a big role. Active participation in these projects, talented and business men and girls are regularly provided with preferential loans. Naturally, such efforts are encouraging young entrepreneurs to search further.

In this regard, it is also worth noting the regular holding of the young entrepreneurs business forum on the topic “topical issues of development of Youth Entrepreneurship” in our country. During the business forum Events, Presentations of new ideas and initiatives of young entrepreneurs are held. Proposals and comments on the effective use of information and communication technologies, production of modern consumer goods, ensuring competitiveness in the process of increasing their quality, development of tourism, social and legal protection of young entrepreneurs, further improvement of normative-legal documents on their activities are discussed in them. As a result, promising proposals, which are relevant to the development of the whole society and the country, are submitted to the relevant ministries, departments and organizations.

It is also worth noting the forum of young leaders, which is being held under the slogan “Youth entrepreneurship – State development”, which is directly related to the agricultural sector. During the Forum,

young people will be able to demonstrate their views on the activities of various products produced by them, banks and other service organizations. Within the framework of the conference, wide-ranging explanatory work is organized on various meetings and dialogues, employment of graduates of educational institutions. It can also be said that the organization of training courses on such issues as the formation and implementation of new business plans, the acquisition of preferential credits has a positive impact on the involvement of many young people in entrepreneurial activities.

In the following years, the educational activities carried out on the theme “entrepreneurship is the future” in order to support youth entrepreneurship are also of great importance in the further development of the understanding and imagination of our youth in this regard. In these events, which are held in cooperation with a number of responsible organizations the importance of the rule of law in attracting young people to the sphere of small business and private entrepreneurship, opportunities for young farmers, entrepreneurship activities of young people by commercial banks the effective work carried out in the field of support, opportunities for young artisans are the attempts to encourage our youth to actively engage in entrepreneurship, to spread the entrepreneurial movement in our country in a wide range of ways. The events on the theme “the first step of young people in business”, which are being organized under the initiative of a number of public organizations, will bring together young entrepreneurs from all over the country it is aimed at support.

In order to support young people, the state program "youth is our future" was adopted, which is aimed at facilitating and supporting the realization of business initiatives, startups, ideas and projects of young people, training of unemployed youth in specialties and skills of doing business, which are in high demand in the labor market, as well as ensuring their employment by increasing the socio-economic activity As noted by President Shavkat Miromonovich Mirziyoyev in this regard, a number of systematic works were carried out in 2018 and within the framework of such programs as” every family – entrepreneur“,” Youth – our future " allocated about 2 trillion soums and more than 2 thousand 600 business projects were implemented in the areas.

In conclusion, it can be noted that the broad opening of the road to entrepreneurship among young people today, the further expansion of the ranks of entrepreneurial youth, the regular enrichment of their knowledge and skills in this regard is an important factor in ensuring the innovative development of our national development. This path of development along with the formation of a generation of young, enterprising and new-thinking entrepreneurs in the future will serve as a great basis for finding a worthy place in the world community of our country.
