Docent, Andijan State University, Andijan, Uzbekistan

**Annotation:** The article deals with respecting the student's personality, including the school of independent thinking and the creation of opportunities and processes for independent work, the science of geography puzzles, practical exercises, different methods and techniques in high school.

**Keywords:** geography, pedagogical skills, modern requirements, education, classroom, approach.

The fields of science, technology and industry are developing rapidly professionals who meet the requirements of modern times in the development of society. Geography is the study of places and the relationships between people and their environments. Geographers explore both the physical properties of Earth's surface and the human societies spread across it. They also examine how human culture interacts with the natural environment and the way those locations and places can have an impact on people. Geography seeks to understand where things are found, why they are there, and how they develop and change over time. It also depends on the level of use of modern information technologies. This is the responsibility of schoolteachers to achieve their effectiveness, to ensure their quality and content, the school of education in the school. During the training s o students' knowledge, skills and abilities secondary school secondary school secondary school secondary school which imposes a high level of responsibility, such as co-ordination at a high level. Today's school is also a modern school for teaching lessons from teacher's secondary school requires an approach. Today it is the most traditional, standardized secondary school. It is not possible to "nail" them in the classroom, to get them interested in the lessons. Because there is a lot of distracting information in the environment, they are high school high school high school high school. In addition to the use of advanced pedagogical technologies in the classroom, Internet secondary school secondary school secondary school. The effective use of websites, the rapid delivery of new information in addition to the textbook is also a key factor in determining the skills of the teacher. At the same time, it is a school of thought for students in the organization of lessons. Organizing a debating process is a high school of knowledge, experience, and secondary education requires skill and inquisitiveness.

Self-motivated, independent-minded, enterprising secondary school to enable them to be, to direct them according to their interests good secondary school high school high school high school high school high school effective. High school high school high school high school high school high school high school high school high school high school high school high school high school high school high school high school high school high school high school high school then a situation arises in which he is unable to express his opinion freely.

In this case, if the opinion expressed by the student is confirmed by the teacher, the error is secondary school secondary school secondary school If the shortcomings are explained, the student will be able to provide feedback and feedback to the secondary school. He does not shy away from sharing. At the same time, the secondary school that provides such an opportunity is the secondary school is grateful to the teacher, he also loves the subject he teaches, teacher secondary school secondary school secondary school a cordial relationship develops between the birds. Some students high school high school high school high school high school high school. He studied science because he respected the teacher, because the teacher studied in high school. His knowledge, demeanor, and skill are in the hearts of the students.

Accurate assessment of psychological state is an important factor in attracting him to science. This is the case with many schools during my pedagogical career we encountered. It is known that the school of geography, along with all other disciplines in the acquisition of secular knowledge is also a necessity. Starting from the academic year 2020-2021, Higher Secondary passing entrance exams in geography is also a subject the unique place in modern science, the necessary secondary school in the economic life of the republic proved to be one of his grievances. At the same time, among the students, this school is a secondary school, a secondary school, a secondary school. We will be witnessed an increase in interest and a rise in the prestige of the subject. Currently, the only students who start studying geography are secondary school students. They are the structure of the earth, the face in the geographical crust the formation of the oceans, the islands' separation from the mainland secondary school, such as climate change, climate change a school of knowledge in information technology, especially from websites use effectively. This can be clearly seen even in these difficult times.

For each fan, open separate groups on Telegram Messenger and take online classes. Assignments given to students at the same time from the educational sites of secondary schools search for answers and show what resources they use secondary school also a happy situation. Geography lessons are fun and creative. Secondary school will be easier to achieve if established. To increase the effectiveness of the secondary school in geography lessons, more visual aids, conversations, discussion methods, movies, various puzzles, tests, practical exercise can be used. In the 4th grade he studied the subject "Natural Science" and entered the 5th grade. For those who are interested in the "Start a Natural Geography Introductory Course" complicates. Only one hour a week of geography class in fifth grade and the language makes it more difficult to adjust the topics. That's why high school is a child's secondary school in the use of methods and techniques to explain topics properties must also be taken into account.

From time immemorial, our forefathers studied weather due to some changes in nature where they knew what the weather would be like. The same feature is observed in children's secondary school should be formed. Slow flight of birds, presence of criteria strings in the air, secondary school and disturbance of ants or pets, forms of clouds, sun. The weather in the west indicates what the weather will be like tomorrow. During the test, students were introduced to natural phenomena, including high school. Skills of tracking changes, analysis of observed results Secondary school is formed. How to use such tests is up to the teacher depending on the approach. Puzzles are also very popular today, their readers its role in increasing and consolidating knowledge is undeniable. Do not browse the magazine, various topics of puzzles such as crossword puzzles, chainwords and species. They are even referred to in secondary school textbooks which we meet. The effective use of puzzles in the teaching process is also acceptable is one of the methods. Puzzles have a secret that is effective for children. First, the school of science read a simple text for children or listen to a teacher's lecture remains boring. In such cases, the answer to the riddle in the puzzle is high school. The sequence of letters is an interesting school of thought for the student and is considered an interesting process. This

is a secondary school in the form of a student game can do. Second, puzzles reinforce memory. Secondary school at the end or a high school for a student solving a puzzle on a topic. If the letter at the beginning or in the middle of the answers becomes unclear, it will be stored in the memory of the high school. For example, the school of various reliefs of the continent, beginning with the letter of forms, place names, climatic zones, various geographical objects in front of the eyes and ma writes the answer from the slave.

The 21st century is a time of technology and information. There are opportunities to prepare video lessons using information technology. The use of various animations in such lessons makes the lessons more interesting. Secondary school. Teachers who do not have a computer or laptop at home are also more likely to attend a mobile high school. Prepare such lessons using various software and applications over the phones they get. The seeker finds an opportunity. Internet browsers include Inshot, Filmix, Du Recorder ”can be downloaded by searching.

These programs through which teachers can test and practice their creative skills secondary school high school high school possible. Such classes, especially when used in distance learning, are a target secondary school will be suitable.

The focus on speech literacy in the classroom is a rapidly evolving school of education they need to keep pace with the times. Only then will the secondary school we are looking at be a secondary school we reach our destination, our goal.
