**Annotatsiya:** Ushbu maqolada Sentob ekoturistik qishlog'i haqida so'z yuritilgan va mavjud holati o'rganilgan. Mavjud holati o'rganilgan holda kamchiliklarni bartaraf etish, turizm qishlog'iga yanada ko'proq turistlarni jalb qilish maqsadida loyiha takliflar berilgan.

**Kalit so'zlar:** Turizm, ekoturizm, stella, selfi zona, ekskursiya.

**Аннотация.** В данной статье рассматривается экотуристический поселок Сентоб и рассматривается его современное состояние. После изучения текущей ситуации были сделаны проектные предложения по устранению недостатков и привлечению большего количества туристов в туристический поселок.

**Ключевые слова:** Туризм, инфраструктура, социально-экономический, ресурсный, инвестиционный.

**Annotation:** This article discusses the ecotourism village of Sentob and examines its current state. After studying the current situation, project proposals were made in order to eliminate the shortcomings and attract more tourists to the tourist village.

**Keywords:** Tourism, infrastructure, socio-economic, resource, investment.

**Introduction.** The number of jobs created by tourism in various industries is significant. In addition to the tourism sector, these jobs may include agriculture, communications, health and education. Many tourists travel to get acquainted with the culture, different traditions and gastronomy of the host country. [1] Our country also attracts people from all over the world with its rich values, culture, traditions, historical and cultural monuments. Sentob ecotourism resort is located in Nurata district of Navoi region. Here you can walk at the foot of the mountain and visit Lake Aydarkol. [2]

**The main part.** With a broad approach to the understanding of ecological tourism, the main objects for tourists to visit are specially protected natural areas of different categories and types. A special, very important aspect of the exhibition objects in ecological tours and excursions is that they consist of various natural and cultural objects, including:

- the most popular and remarkable biological species (representatives of flora and fauna), flagship species, endemic and relict species;
- unique objects and phenomena of inanimate nature (geological, geomorphological, hydrological and other landscape elements);
- exotic plant communities and biocenoses in general;
- quarries where paleontological, petrographic, botanical and other finds can be found for the collection;
- general natural-anthropogenic (cultural) landscapes, cultural, ethnographic, archeological, historical and monumental objects located in them. [5]

Ecotourism is also developing in our country. The village of Sentob in Nurata is also known as Simtob. According to a legend narrated by the elders, they called it "Simtab" which means "Shiny Silver". From ancient times to the present day, crystal clear mineral water flows from the rocks. The architecture and design of many

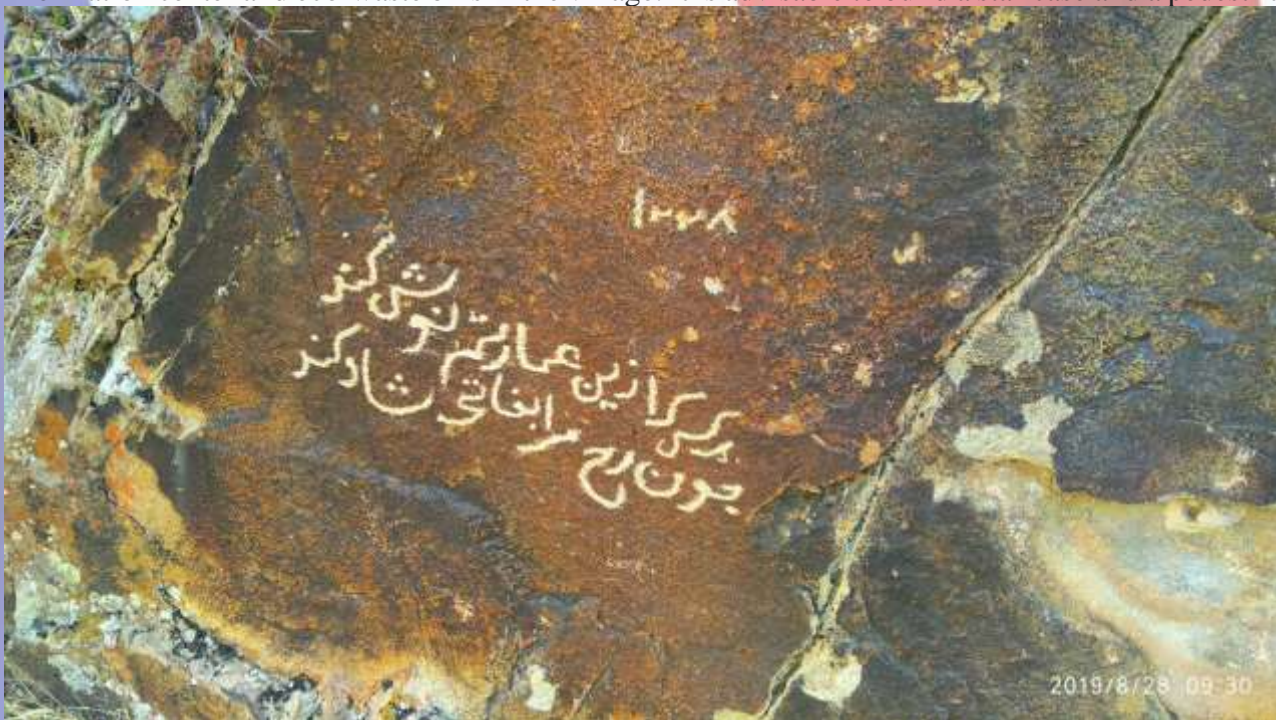

<https://conferencea.org>

of the houses in the village have been studied and estimated to have been built 2,000 years ago. This miracle of nature has become the heritage of the local people. Tourists visiting here will enjoy the old architectural representations of more than 2000 years. The mountains are located 15 kilometers from the village of Sentob in Nurata. Tourists are particularly interested in the oil and glyphs carved into the rocks of the 5th-6th centuries, which are known as one of the sights of Nurata. The ruins of the ancient fortress, as well as the picturesque views of the lake can be seen. There is an artificial gorge dug with mines on the mountain. Once upon a time, gold was mined here. This tree has not been studied to the end, and it is reason enough to attract the attention of those interested. [3] Petroglyphs from the 5th to 6th centuries, ancient ruins on the top of the mountain, stone inscriptions from the 11th to the 18th centuries, and views of Lake Fozilmon at the highest point of the village have always fascinated visitors. .

For example, on the rocks of the Black Mountain, 12 km from the village of Sentob, you can find many inscriptions in the style of Kohi Arabic, fragments of verses from the Qur'an and ancient castles. In the village of Sentob Sentob reservoir, Ancient caravanserais, shrines "Khoja Porsho", "Khoja Mahmad Savrato", one of the planes of the Zoroastrian religion Qadi Biy Temple, "Chashmai ako" spring, ancient castles, existing historical objects pictographs, mountain inscriptions in Arabic graphics, houses built of mountain stones, the preservation of the architecture of a unique mountainous area is of great historical significance. [6]

The ecotourism project itself and the monitoring of the nature of the area began in 2007. There are 3 hotels for guests. [4] Today, despite the growing demand for tourism, there are many inconveniences in the area. unsecured and have similar shortcomings.

In order to overcome these shortcomings and increase the tourist attractiveness, we, together with our working group, have developed proposals for the installation of a stella, selfie zone, sanitary station, tourist information center and eco-waste bins in the village. It is advisable to build a staircase and a pedestrian bridge.
